

How To Know
When A *Girl*
Is Ready To Be Kissed...

*A Rejection Free Proven Technique
for Dating Success!*

James Maclane - socialcoach.com

Do You Know When A Woman Is Ready To Be Kissed?

Have you ever asked yourself something like this:

“I really like her and I think she likes me, but I’ve got no freakin’ idea how or when to make a move. And how do I know when she’s ready for me to try and kiss her?”

This causes untold frustration to 95% of men. Even guys in their 50’s and late 60’s are asking us these questions.

So we’ve prepared this Special Report, directly from our 3 Day Bootcamp With Female Trainers to answer all your questions.

We’re going to give you the smoothest, subtlest, rejection free Kiss Test on the planet. One that carries the stamp of approval of our 8 Gorgeous Female Trainers and countless guys who’ve gone from dud to stud with this 1 simple technique

But are you Guy 1 or Guy 2?

Guy 1: Wussy Nice Guy

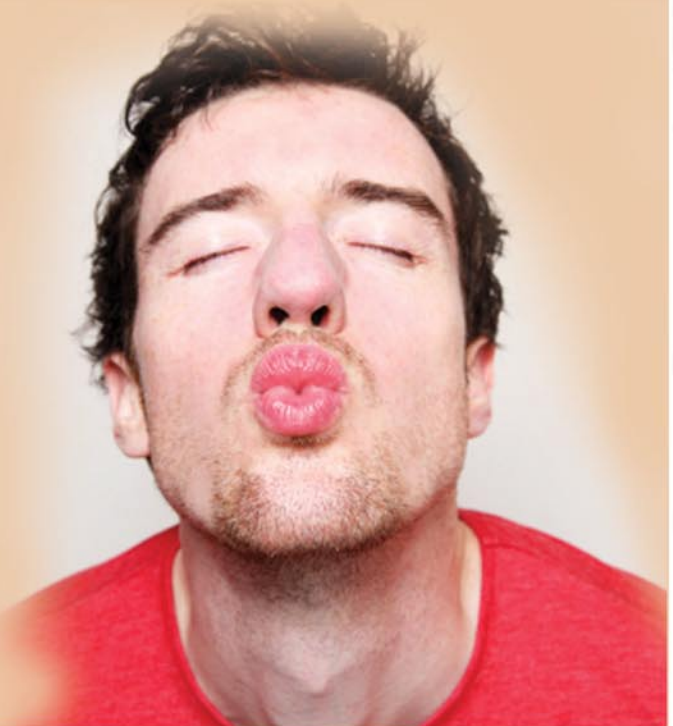

You typically wait far too long before you try to kiss a girl. You might be one of the “procrastination guys”. You keep delaying taking action, waiting for the “perfect moment” and this ends up with her sitting in your car at the end of the 2nd, 3rd or even 4th date. As she’s saying goodbye and reaching for the door you lunge over the handbrake straight at her. Or perhaps you wait for her to actually kiss you, or for some unambiguous sign of approval like she takes her top off and yells “come and get them big boy” before you do anything.

Women assume you’re a just big Wussy Nice Guy. You’ve no idea what you’re doing with women or you’re not man enough to take charge and make something happen. Or alternately if you seem confident, successful or handsome to her she might just assume that you don’t really like her that much.

Either way she quickly loses any romantic or sexual attraction she may have had and puts you straight in the dreaded “Friend Zone.” Ahhhh!

Guy 2: The Sleaze

You typically make a move before she’s ready. Perhaps you try to kiss her before you’ve built up enough conversational rapport. Maybe you skip past a bunch of key steps on the Seduction Ladder like trying to kiss her without using touch and eye contact to skillfully work her up to the kiss stage.

If you try to kiss her too early, before she is ready, you can blow it and easily humiliate yourself. You'll find it's really tough to recover from an awkward moment when you lunge in for the first kiss and she pulls away, turns her head and makes a "yuck" face. Making a move too soon can have her thinking you're just a sleaze, only interested in getting in her pants.

If she really likes you, she might at least give you credit for having the courage to try. And that's way better in my book than being a Wussy Nice Guy, but she'll still think you're pretty inexperienced with women. If you knew what you were doing you would have read and tested her signals before you made such a bold move like a first kiss.

So where does that leave you? Frustrated and possibly horny, but all alone yet again.

Thankfully, there is a 3rd Alternative. We call him the Smart Seducer, and he understands that there are a series of steps in the Seduction Process.

I guess in my early 30's I went from being the most pathetic Wussy Nice Guy you've ever met to a Smart Seducer. I have not been rejected going in for a kiss in a decade.

In this report you'll discover the simple, effective, subtle and rejection free way to know exactly when a woman is ready to be kissed. And you'll start your own journey from Wussy Nice Guy or Sleaze to becoming a Smart Seducer soon...

Why Are So Many Guys Getting This So Wrong?

One big reason... Hollywood. From a young age we're heavily influenced by the typical Hollywood romance. Guy meets girl and at first they can't stand each other. Fate then produces some big event that throws them together. Soon both the guy and the girl realise they are destined to be with each other, they leap into a passionate kiss and then CUT! They're lying in bed together smoking a cigarette (at least in the 50's) having done the deed.

This is the model of romance that English-speaking men have to learn from!

Meet Kiss Sex.

This is ridiculous!

In the Hollywood model there are no small steps in between the meet and the kiss, and the kiss and the sex. There should be 10, 20 or more small steps in between where you gradually increase the intimacy and duration of your touching and eye contact. All the while you skillfully deepen the conversation and move the girl from one location to another to keep things interesting.

No wonder us English speaking men struggle with women. We don't even know how to smoothly get the first kiss.

What We Usually Do...

Following the silly Hollywood model, guys are going about dating completely wrong. They are taking a woman out on two or three dates, paying for dinner and doing all the "gentlemanly things" without actually taking any real action.

Inevitably you get to the end of the third or fourth date and you're wondering whether she actually likes you, plus you're starting to stress about all the time, money and effort you've spent. So that's when you make the sudden lunge at her as she's about to get out of your car.

Or maybe you do the gentlemanly thing you see in the movies and walk her to her front door where you finally go for the first kiss as she's about to walk inside. Or more likely the old favourite: drink enough together and hope the alcohol takes care of it.

Sorry, but this sort of Wussy Nice Guy behavior is just not sexy to a woman.

It's time to learn how to be a man!

Life Lesson Number 1: Women Don't Respect Men Who Can't Pick Up Other Women

If you only learn one thing from this report, make sure it's this: **women don't respect men who cannot easily pick up other women of or about their caliber.**

Even if a woman is initially attracted to you for some reason - your sense of humor, success, good looks, body or common interests - if you don't know how to make a move it will be much less likely you'll actually get to have sex with her. And if you ever do get into a serious relationship she may soon walk all over you because she knows you're not good at picking up other women. And she's got all the power!

Now I'm definitely not saying women are nasty or bad. Please get that clear. Some men take advantage of weak, insecure women also. Many bosses take advantage of their employees, paying them \$50K when they know they are worth at least \$80K. Strong, rich countries take advantage of weak countries and scrawny kids get bullied in school. And I believe many women are going to (eventually) take advantage of you if they don't think you can easily meet and pick up other women. I'm just saying that in this world the weak usually get taken advantage of by the strong. It's just the way it is.

Why You Need The Skills To Make A Move

If you don't know when a woman is ready to be kissed it will hold you back from taking action with the women you like. Women you are really attracted to will just slip through your fingers. You're left relying on fate or dumb luck to drop amazing women into your life. I mean how often does this happen? And even then fate needs to stick you and her together long enough that she finally decides to pick you up.

Once you have the ability to smoothly make a move on attractive women you'll have infinitely more choice and control over your dating and sex life. Which means more sex, with hotter women and much higher quality girlfriends.

The Famous "Hair" Kiss Test...

There are dozens of theories out on the internet about the best way to go about the first kiss. Some of them are ok, many are downright awful. The most famous one, we'll call it the "Hair" Kiss Test, was marketed heavily a few years back.

According to the "Hair" Kiss Test if you're with a girl and you want to kiss her, you should reach out and touch her hair - maybe brush it out of her eyes or tuck it behind her ear. The theory goes that if she will let you touch her hair that intimately, then she is ready to kiss you.

We're definitely not saying the "Hair" Kiss Test is wrong - we agree that if a girl can accept that kind of intimate touch she could well be thinking about kissing you - but there are some important problems with it.

The main thing is it's fairly aggressive and not very subtle. It could feel like quite a "jolt!" to a woman in so many situations. Sure, it's still much better than launching directly for a kiss, but trying the "Hair" Kiss Test could still make her feel uncomfortable if you go too soon. And she may well pull back and lose attraction to you.

I'd be careful about using it in public situations, especially so at a place where her girlfriends may be around. If they see a strange guy touch their friends' hair they will almost certainly come over and "protect" her from you..

For instance, if you're in a bar and her friends see you try the "Hair" Kiss Test, they know immediately you're hitting on their her and they will probably come to "rescue" her, or "cock block" and pull her away from you. If you tuck a girl's hair behind her ear it is a really obvious movement and telegraphs to everyone that you are aggressively hitting on her.

We think there is a much more subtle and intelligent way of finding out if a girl is ready to be kissed...

James' Kiss Test

The secret to James' Kiss Test is a series of simple, rejection free steps towards holding her hand. It sounds boring but it's actually pretty sophisticated. Let's break it down...

Holding hands is a surprisingly intimate thing to do. If you're game, try it with a male friend: interlock your fingers and hold hands. It feels a bit weird right?!

The only person you want to be intimately holding hands with (especially with interlocked fingers) is someone who you are either having sex with or hope to soon have sex with. So, it follows that if a woman is willing to hold your hand, it's a good sign to you that she's into you and is ready to be kissed.

But there is a bit more to it than just that as you'll learn soon.

When To Do James' Kiss Test

The first thing you need to understand is that James' Kiss Test works in tandem with the other social and dating skills we teach at Social Coach like building rapport with conversation, eye contact and touch.

Once you've built a good conversation and have touched her on the arm, the small of her back and her hips and you're having an enjoyable conversation in relative privacy, you're ready to try James' Kiss Test.

Here are three key things to do to lead up to James' Kiss Test:

1. Start and sustain a good conversation using open ended questions.
2. Use good eye contact to demonstrate that you're physically and emotionally attracted to the girl.
3. Use touch and body positioning to become more and more intimate with her.

James' Kiss Test - Step By Step

1. Start off by delicately brushing the tips of her fingers, which is a sensitive part of the human body. Don't make a big show of it, it's far better if you can do it absentmindedly while holding strong eye contact and carrying on an enjoyable conversation.
2. Then slowly start playing with her fingers. Be very gentle and low-key. If that is received well (meaning she doesn't pull her hand away)...
3. Slide your fingers into hers and interlock fingers so that you are holding hands.
4. Then, when you are holding her hand comfortably, hold her eye contact and...
5. Stop Talking! The sexual tension between the two of you will crank right up. This is the spark or "chemistry" that women are always talking about feeling with guys they like. If you continuing to jabber on while holding hands you'll dissipate the sexual tension and most of the magic is lost. So please, just shut up!
6. Look deeply into her eyes along with the handholding and the silence. There should now be an explosion of sexual tension. If she doesn't want to kiss you she'll get a little uncomfortable, and casually look away and pull her hand back. No big deal. But if she keeps holding your hand and your eye contact then...
7. She's ready to be kissed! Woohoo! So you can go for it and know it's almost certainly going to work.

As a huge added bonus there is also a high chance she is actually thinking about sleeping with you, and quite probably will provided you don't screw something up in the future. Mind you us men are experts at screwing up with women we really like.

How Do You Know If You Did The Kiss Test Well...

If you got it right she'll probably get all giggly, smile a lot and/or blush. She might start actually touching you more or paying you nice compliments.

If it hasn't worked... if you've gone in too soon or she's not quite ready... you'll know right away. When you start to gently touch her fingers she'll subtly move her hand away from yours. That's all! No big drama or awkward moment that makes you want to slink away and hide.

It's A Rejection, Pain And Humiliation Free Kiss Test!

While the "Hair" Kiss Test may work, we believe James' Kiss Test is a much more sophisticated way to do it. It eliminates so much of the possibility that you'll make her feel uncomfortable or get rejected.

If you're in a bar or on a date with a girl and you reach up and touch her hair before she's ready it can be a major turn off and often a deal breaker that you can't recover from. In some situations the "Hair" Kiss Test might actually demonstrate poor social intelligence.

If you are off in terms of your timing, or you are reading her signals incorrectly and make that kind of big leap, you've blown it because it just becomes so awkward for her. Whereas if you softly brush against her fingers and she's not into it yet, she can just casually move her hand away and you're not really losing any ground.

It is far less embarrassing for both you and the girl.

What To Do If She Does Withdraw Her Hand...

If the woman does withdraw her hand it's not a big deal at all. It just means "Let's just slow down a bit buddy, you're moving a bit fast." So then you just pause, go back and build an even better conversation, then use good touch and eye contact and then try for her fingers again a bit later.

The main point here is that with James' Kiss Test you haven't created any uncomfortable or awkward moments. You can rebound and continue on even if you get the signals wrong. And when you're trying to meet and seduce women, you're going to get some signals wrong all the freakin' time, even if you've already successfully bedded an ungodly number of attractive women.

Why? Because every woman and every situation is different.

One Last Thing...

Nothing in dating is foolproof. Nothing is an absolute. But with James' Kiss Test you have a powerful yet subtle, sophisticated and largely rejection-free way to know when a girl is ready to be kissed. And having a strategy for making a move on women, without being a slime-ball or waiting around like a puppy-dog nice guy, will open up a whole new life for you with women.

Most women do not want to be responsible for making sex happen, even when they really like you.

You're a man. It's your job to take action!

Now you know what to do, go out, meet some girls, find one you like and try James' Kiss Test this weekend. It doesn't take too much practice to get the hang of it, and it will soon open up a whole new world of rejection free fooling around.

And with subtle moves like this one, the ladies will be thinking "Oh God, he's oh so smooth".

Happy smooching!
